

[Continuation of statement from Part 1.](#)

Facts regarding the unauthorized storage and disclosure of the SigActs.

As indicated above I created copies of the CIDNE-I and CIDNE-A SigAct tables as part of the process of backing up information. At the time I did so, I did not intend to use this information for any purpose other than for back up. However, I later decided to release this information publicly. At that time, I believe and still believe that these tables are two of the most significant documents of our time.

On 8 January 2010, I collected the CD-RW I stored in the conference room of the T-SCIF and placed it into the cargo pocket of my ACU or Army Combat Uniform. At the end of my shift, I took the CD-RW out of the T-SCIF and brought it to my Containerized Housing Unit of CHU. I copied the data onto my personal laptop. Later at the beginning of my shift, I returned the CD-RW back to the conference room of the T-SCIF. At the time I saved the SigActs to my laptop, I planned to take them with me on mid-tour leave and decide what to do with them.

At some point prior to my mid-tour, I transferred the information from my computer to a Secure Digital memory card from my digital camera. The SD card for the camera also worked on my computer and allowed me to store the SigAct tables in a secure manner for transport.

I began mid-tour leave on 23 January 2010, flying from Atlanta, Georgia to Reagan National Airport in Virginia. I arrived at the home of my aunt, Debra M. Van Alstyne, in Potomac, Maryland and quickly got into contact with my then boyfriend, Tyler R. Watkins. Tyler, then a student at Brandeis University in Waltham, Massachusetts, and I made plans for me to visit him in Boston, Massachusetts [missed word].

I was excited to see Tyler and planned on talking to Tyler about where our relationship was going and about my time in Iraq. However, when I arrived in the Boston area Tyler and I seemed to become distant. He did not seem very excited about my return from Iraq. I

tried talking to him about our relationship but he refused to make any plans.

I also tried to raising the topic of releasing the CIDNE-I and CIDNE-A SigAct tables to the public. I asked Tyler hypothetical questions about what he would do if he had documents that he thought the public needed access to. Tyler really didn't have a specific answer for me. He tried to answer the questions and be supportive, but seemed confused by the question in this context.

I then tried to be more specific, but he asked too many questions. Rather than try to explain my dilemma, I decided to just drop the conversation. After a few days in Waltham, I began to feel really bad. I was over staying my welcome, and I returned to Maryland. I spent the remainder of my time on leave in the Washington, DC area.

During this time a blizzard bombarded the mid-atlantic, and I spent a significant period of time essentially stuck in my aunt's house in Maryland. I began to think about what I knew and the information I still had in my possession. For me, the SigActs represented the on the ground reality of both the conflicts in Iraq and Afghanistan.

I felt that we were risking so much for people that seemed unwilling to cooperate with us, leading to frustration and anger on both sides. I began to become depressed with the situation that we found ourselves increasingly mired in year after year. The SigActs documented this in great detail and provide a context of what we were seeing on the ground.

In attempting to conduct counter-terrorism or CT and counter-insurgency COIN operations we became obsessed with capturing and killing human targets on lists and not being suspicious of and avoiding cooperation with our Host Nation partners, and ignoring the second and third order effects of accomplishing short-term goals and missions. I believe that if the general public, especially the American public, had access to the information contained within the CIDNE-I and CIDNE-A tables this could spark a domestic debate on the role of the military and our foreign policy in general as [missed word] as it related to Iraq and Afghanistan.

I also believed the detailed analysis of the data over a long period of time by different sectors of society might cause society to reevaluate the need or even the desire to even to

engage in counterterrorism and counterinsurgency operations that ignore the complex dynamics of the people living in the effected environment everyday.

At my aunt's house I debated what I should do with the SigActs-- in particular whether I should hold on to them-- or expose them through a press agency. At this point I decided that it made sense to try to expose the SigAct tables to an American newspaper. I first called my local news paper, The Washington Post, and spoke with a woman saying that she was a reporter. I asked her if the Washington Post would be interested in receiving information that would have enormous value to the American public.

Although we spoke for about five minutes concerning the general nature of what I possessed, I do not believe she took me seriously. She informed me that the Washington Post would possibly be interested, but that such decisions were made only after seeing the information I was referring to and after consideration by senior editors.

I then decided to contact [missed word] the most popular newspaper, The New York Times. I called the public editor number on The New York Times website. The phone rang and was answered by a machine. I went through the menu to the section for news tips. I was routed to an answering machine. I left a message stating I had access to information about Iraq and Afghanistan that I believed was very important. However, despite leaving my Skype phone number and personal email address, I never received a reply from The New York Times.

I also briefly considered dropping into the office for the Political Commentary blog, Politico, however the weather conditions during my leave hampered my efforts to travel. After these failed efforts I had ultimately decided to submit the materials to the WLO. I was not sure if the WLO would actually publish these SigAct tables [missed a few words]. I was concerned that they might not be noticed by the American media. However, based upon what I read about the WLO through my research described above, this seemed to be the best medium for publishing this information to the world within my reach.

At my aunts house I joined in on an IRC conversation and stated I had information that needed to be shared with the world. I wrote that the information would help document the true cost of the wars in Iraq and Afghanistan. One of the individuals in the IRC asked me to describe the information. However, before I could describe the information another individual pointed me to the link for the WLO web site online submission system. After

ending my IRC connection, I considered my options one more time. Ultimately, I felt that the right thing to do was to release the SigActs.

On 3 February 2010, I visited the WLO website on my computer and clicked on the submit documents link. Next I found the submit your information online link and elected to submit the SigActs via the onion router or TOR anonymizing network by special link. TOR is a system intended to provide anonymity online. The software routes internet traffic through a network of servers and other TOR clients in order to conceal the user's location and identity.

I was familiar with TOR and had it previously installed on a computer to anonymously monitor the social media website of militia groups operating within central Iraq. I followed the prompts and attached the compressed data files of CIDNE-I and CIDNE-A SigActs. I attached a text file I drafted while preparing to provide the documents to the Washington Post. It provided rough guidelines saying 'It's already been sanitized of any source identifying information. You might need to sit on this information-- perhaps 90 to 100 days to figure out how best to release such a large amount of data and to protect its source. This is possibly one of the more significant documents of our time removing the fog of war and revealing the true nature of twenty-first century asymmetric warfare. Have a good day.'

After sending this, I left the SD card in a camera case at my aunt's house in the event I needed it again in the future. I returned from mid-tour leave on 11 February 2010. Although the information had not yet been publicly by the WLO, I felt this sense of relief by them having it. I felt I had accomplished something that allowed me to have a clear conscience based upon what I had seen and read about and knew were happening in both Iraq and Afghanistan everyday.

Facts regarding the unauthorized storage and disclosure of 10 Reykjavik 13.

I first became aware of the diplomatic cables during my training period in AIT. I later learned about the Department of State or DoS Net-centric Diplomacy NCD portal from the 2/10 Brigade Combat Team S2, Captain Steven Lim. Captain Lim sent a section wide email to the other analysts and officer in late December 2009 containing the SIPRnet link to the portal along with the instructions to look at the cables contained within them and to incorporate them into our work product.

Shortly after this I also noticed the diplomatic cables were being reported to in products from the corp level US Forces Iraq or US-I. Based upon [Captain Lim's](#) direction to become familiar with its contents, I read virtually every published cable concerning Iraq.

I also began scanning the database and reading other random cables that piqued my curiosity. It was around this time-- in early to mid-January of 2010, that I began searching the database for information on Iceland. I became interested in Iceland due to the IRC conversations I viewed in the WLO channel discussing an issue called Icesave. At this time I was not very familiar with the topic, but it seemed to be a big issue for those participating in the conversation. This is when I decided to investigate and conduct a few searches on Iceland and find out more.

At the time, I did not find anything discussing the Icesave issue either directly or indirectly. I then conducted an open source search for Icesave. I then learned that Iceland was involved in a dispute with the United Kingdom and the Netherlands concerning the financial collapse of one or more of Iceland's banks. According to open source reporting much of the public controversy involved the United Kingdom's use of anti-terrorism legislation against Iceland in order to freeze Icelandic assets for payment of the guarantees for UK depositors that lost money.

Shortly after returning from mid-tour leave, I returned to the Net Centric Diplomacy portal to search for information on Iceland and Icesave as the topic had not abated on the WLO IRC channel. To my surprise, on 14 February 2010, I found the cable 10 Reykjavik 13, which referenced the Icesave issue directly.

The cable published on 13 January 2010 was just over two pages in length. I read the cable and quickly concluded that Iceland was essentially being bullied diplomatically by two larger European powers. It appeared to me that Iceland was out viable options and was coming to the US for assistance. Despite the quiet request for assistance, it did not appear that we were going to do anything.

From my perspective it appeared that we were not getting involved due to the lack of long term geopolitical benefit to do so. After digesting the contents of 10 Reykjavik 13 I debated whether this was something I should send to the WLO. At this point the WLO had not

published or acknowledged receipt of the CIDNE-I and CIDNE-A tables. Despite not knowing that the SigActs were a priority for the WLO, I decided the cable was something that would be important. I felt that I would be able to right a wrong by having them publish this document. I burned the information onto a CD-RW on 15 February 2010, took it to my CHU, and saved it onto my personal laptop.

I navigated to the WLO website via a TOR connection like before and uploaded the document via the secure form. Amazingly, when WLO published 10 Reykjavik 13 within hours, proving that the form worked and that they must have received the SigAct tables.

Facts regarding the unauthorized storage and disclosure of the 12 July 2007 aerial weapons team or AW team video.

During the mid-February 2010 time frame the 2nd Brigade Combat Team, 10th Mountain Division targeting analysts, then Specialist Jihrleah W. Showman discussed a video that [Ms. Showman](#) had found on the 'T' drive.

The video depicted several individuals being engaged by an aerial weapons team. At first I did not consider the video very special, as I have viewed countless other war porn type videos depicting combat. However, the recording of audio comments by the aerial weapons team crew and the second engagement in the video of an unarmed bongo truck troubled me.

As Showman and a few other analysts and officers in the T-SCIF commented on the video and debated whether the crew violated the rules of engagement or ROE in the second engagement, I shied away from this debate, instead conducting some research on the event. I wanted to learn what happened and whether there was any background to the events of the day that the event occurred, 12 July 2007.

Using Google I searched for the event by its date by its general location. I found several new accounts involving two Reuters employees who were killed during the aerial weapon team engagement. Another story explained that Reuters had requested for a copy of the video under the Freedom of Information Act or FOIA. Reuters wanted to view the video in

order to understand what had happened and to improve their safety practices in combat zones. A spokesperson for Reuters was quoted saying that the video might help avoid the reoccurrence of the tragedy and believed there was a compelling need for the immediate release of the video.

Despite the submission of the FOIA request, the news account explained that CENTCOM replied to Reuters stating that they could not give a time frame for considering a FOIA request and that the video might no longer exist. Another story I found written a year later said that even though Reuters was still pursuing their request. They still did not receive a formal response or written determination in accordance with FOIA.

The fact neither CENTCOM or Multi National Forces Iraq or MNF-I would not voluntarily release the video troubled me further. It was clear to me that the event happened because the aerial weapons team mistakenly identified Reuters employees as a potential threat and that the people in the bongo truck were merely attempting to assist the wounded. The people in the van were not a threat but merely 'good samaritans'. The most alarming aspect of the video to me, however, was the seemingly delightful bloodlust they appeared to have.

The dehumanized the individuals they were engaging and seemed to not value human life by referring to them as quote "dead bastards" unquote and congratulating each other on the ability to kill in large numbers. At one point in the video there is an individual on the ground attempting to crawl to safety. The individual is seriously wounded. Instead of calling for medical attention to the location, one of the aerial weapons team crew members verbally asks for the wounded person to pick up a weapon so that he can have a reason to engage. For me, this seems similar to a child torturing ants with a magnifying glass.

While saddened by the aerial weapons team crew's lack of concern about human life, I was disturbed by the response of the discovery of injured children at the scene. In the video, you can see that the bongo truck driving up to assist the wounded individual. In response the aerial weapons team crew-- as soon as the individuals are a threat, they repeatedly request for authorization to fire on the bongo truck and once granted they engage the vehicle at least six times.

Shortly after the second engagement, a mechanized infantry unit arrives at the scene. Within minutes, the aerial weapons team crew learns that children were in the van and despite the injuries the crew exhibits no remorse. Instead, they downplay the significance

of their actions, saying quote 'Well, it's their fault for bringing their kid's into a battle' unquote.

The aerial weapons team crew members sound like they lack sympathy for the children or the parents. Later in a particularly disturbing manner, the aerial weapons team verbalizes enjoyment at the sight of one of the ground vehicles driving over a body-- or one of the bodies. As I continued my research, I found an article discussing the book, *The Good Soldiers*, written by Washington Post writer David Finkel.

In Mr. Finkel book, he writes about the aerial weapons team attack. As, I read an online excerpt in Google Books, I followed Mr. Finkel's account of the event belonging to the video. I quickly realize that Mr. Finkel was quoting, I feel in verbatim, the audio communications of the aerial weapons team crew.

It is clear to me that Mr. Finkel obtained access and a copy of the video during his tenure as an embedded journalist. I was aghast at Mr. Finkel's portrayal of the incident. Reading his account, one would believe the engagement was somehow justified as 'payback' for an earlier attack that lead to the death of a soldier. Mr. Finkel ends his account by discussing how a soldier finds an individual still alive from the attack. He writes that the soldier finds him and sees him gesture with his two forefingers together, a common method in the Middle East to communicate that they are friendly. However, instead of assisting him, the soldier makes an obscene gesture extending his middle finger.

The individual apparently dies shortly thereafter. Reading this, I can only think of how this person was simply trying to help others, and then he quickly finds he needs help as well. To make matter worse, in the last moments of his life, he continues to express his friendly gesture-- only to find himself receiving this well known gesture of unfriendliness. For me it's all a big mess, and I am left wondering what these things mean, and how it all fits together. It burdens me emotionally.

I saved a copy of the video on my workstation. I searched for and found the rules of engagement, the rules of engagement annexes, and a flow chart from the 2007 time period-- as well as an unclassified Rules of Engagement smart card from 2006. On 15 February 2010 I burned these documents onto a CD-RW, the same time I burned the 10 Reykjavik 13 cable onto a CD-RW. At the time, I placed the video and rules for engagement information

onto my personal laptop in my CHU. I planned to keep this information there until I redeployed in Summer 2010. I planned on providing this to the Reuters office in London to assist them in preventing events such as this in the future.

However, after the WLO published 10 Reykjavik 13 I altered my plans. I decided to provide the video and the rules of engagement to them so that Reuters would have this information before I re-deployed from Iraq. On about 21 February 2010, I described above, I used the WLO submission form and uploaded the documents. The WLO released the video on 5 April 2010. After the release, I was concerned about the impact of the video and how it would be received by the general public.

I hoped that the public would be as alarmed as me about the conduct of the aerial weapons team crew members. I wanted the American public to know that not everyone in Iraq and Afghanistan are targets that needed to be neutralized, but rather people who were struggling to live in the pressure cooker environment of what we call asymmetric warfare. After the release I was encouraged by the response in the media and general public, who observed the aerial weapons team video. As I hoped, others were just as troubled-- if not more troubled than me by what they saw.

At this time, I began seeing reports claiming that the Department of Defense and CENTCOM could not confirm the authenticity of the video. Additionally, one of my supervisors, [Captain Casey Fulton](#), stated her belief that the video was not authentic. In her response, I decided to ensure that the authenticity of the video would not be questioned in the future. On 25 February 2010, I emailed Captain Fulton, a link to the video that was on our 'T' drive, and a copy of the video published by WLO that was collected by the open source center, so she could compare them herself.

Around this time frame, I burned a second CD-RW containing the aerial weapons team video. In order to make it appear authentic, I placed a classification sticker and wrote Reuters FOIA REQ on its face. I placed the CD-RW in one of my personal CD cases containing a set of 'Starting Out in Arabic CD's.' I planned on mailing out the CD-RW to Reuters after our re-deployment, so they could have a copy that was unquestionably authentic.

Almost immediately after submitting the aerial weapons team video and rules of engagement documents I notified the individuals in the WLO IRC to expect an important

submission. I received a response from an individual going by the handle of 'ox'-- at first our conversations were general in nature, but over time as our conversations progressed, I accessed this individual to be an important part of the WLO.

Due to the strict adherence of anonymity by the WLO, we never exchanged identifying information. However, I believe the individual was likely Mr. Julian Assange [he pronounced it with three syllables], Mr. Daniel Schmidt, or a proxy representative of Mr. Assange and Schmidt.

As the communications transferred from IRC to the Jabber client, I gave 'ox' and later 'pressassociation' the name of Nathaniel Frank in my address book, after the author of a book I read in 2009.

After a period of time, I developed what I felt was a friendly relationship with Nathaniel. Our mutual interest in information technology and politics made our conversations enjoyable. We engaged in conversation often. Sometimes as long as an hour or more. I often looked forward to my conversations with Nathaniel after work.

The anonymity that was provided by TOR and the Jabber client and the WLO's policy allowed me to feel I could just be myself, free of the concerns of social labeling and perceptions that are often placed upon me in real life. In real life, I lacked a closed friendship with the people I worked with in my section, the S2 section.

In my section, the S2 section supported battalions and the 2nd Brigade Combat Team as a whole. For instance, I lacked close ties with my roommate to his discomfort regarding my perceived sexual orientation. Over the next few months, I stayed in frequent contact with Nathaniel. We conversed on nearly a daily basis and I felt that we were developing a friendship.

Conversations covered many topics and I enjoyed the ability to talk about pretty much everything, and not just the publications that the WLO was working on. In retrospect that these dynamics were artificial and were valued more by myself than Nathaniel. For me these conversations represented an opportunity to escape from the immense pressures and anxiety that I experienced and built up through out the deployment. It seems that as I tried

harder to fit in at work, the more I seemed to alienate my peers and lose respect, trust, and support I needed.

Facts regarding the unauthorized storage and disclosure of documents related to the detainments by the Iraqi Federal Police or FP, and the Detainee Assessment Briefs, and the USACIC United States Army Counter Intelligence Center report.

On 27 February 2010, a report was received from a subordinate battalion. The report described an event in which the Federal Police or FP detained 15 individuals for printing anti-Iraqi literature. On 2 March 2010, I received instructions from an S3 section officer in the 2nd Brigade Combat Team, 10th Mountain Division Tactical Operation Center or TOC to investigate the matter, and figure out who the quote 'bad guys' unquote were and how significant this event was for the Federal Police.

Over the course of my research I found that none of the individuals had previous ties to anti-Iraqi actions or suspected terrorist militia groups. A few hours later, I received several [playlist?] from the scene-- from this subordinate battalion. They were accidentally sent to an officer on a different team on the S2 section and she forwarded them to me.

These photos included picture of the individuals, pallets of unprinted paper and seized copies of the final printed material or the printed document; and a high resolution photo of the printed material itself. I printed up one [missed word] copy of a high resolution photo-- I laminated it for ease of use and transfer. I then walked to the TOC and delivered the laminated copy to our category two interpreter.

She reviewed the information and about a half and hour later delivered a rough written transcript in English to the S2 section. I read the transcript and followed up with her, asking her for her take on the content. She said it was easy for her to transcribe verbatim, since I blew up the photograph and laminated it. She said the general nature of the document was benign. The document, as I had sensed as well, was merely a scholarly critique of the then current Iraqi Prime Minister Nouri al-Maliki.

It detailed corruption within the cabinet of al-Maliki's government and the financial impact of his corruption on the Iraqi people. After discovering this discrepancy between the Federal

Police's report and the interpreter's transcript, I forwarded this discovery to the top OIC and the battle NCOIC. The top OIC and the overhearing battle captain informed me that they didn't need or want to know this information anymore. They told me to quote "drop it" unquote and to just assist them and the Federal Police in finding out, where more of these print shops creating quote 'anti-Iraqi literature' unquote.

I couldn't believe what I heard and I returned to the T-SCIF and complained to the other analysts and my section NCOIC about what happened. Some were sympathetic, but no one wanted to do anything about it.

I am the type of person who likes to know how things work. And, as an analyst, this means I always want to figure out the truth. Unlike other analysts in my section or other sections within the 2nd Brigade Combat Team, I was not satisfied with just scratching the surface and producing canned or cookie cutter assessments. I wanted to know why something was the way it was, and what we could do to correct or mitigate a situation.

I knew that if I continued to assist the Baghdad Federal Police in identifying the political opponents of Prime Minister al-Maliki, those people would be arrested and in the custody of the Special Unit of the Baghdad Federal Police and very likely tortured and not seen again for a very long time-- if ever.

Instead of assisting the Special Unit of the Baghdad Federal Police, I decided to take the information and expose it to the WLO, in the hope that before the upcoming 7 March 2010 election, they could generate some immediate press on the issue and prevent this unit of the Federal Police from continuing to crack down in political opponents of al-Maliki.

On 4 March 2010, I burned the report, the photos, the high resolution copy of the pamphlet, and the interpreters hand written transcript onto a CD-RW. I took the CD-RW to my CHU and copied the data onto my personal computer. Unlike the times before, instead of uploading the information through the WLO website submission form. I made a Secure File Transfer Protocol or SFTP connection to a file drop box operated by the WLO.

The drop box contained a folder that allowed me to upload directly into it. Saving files into this directory. Allowed anyone with log in access to server to view and download them. After

uploading these files to the WLO, on 5 March 2010, I notified Nathaniel over Jabber. Although sympathetic, he said that the WLO needed more information to confirm the event in order for it to be published or to gain interest in the international media.

I attempted to provide the specifics, but to my disappointment, the WLO website chose not to publish this information. At the same time, I began sifting through information from the US Southern Command or SOUTHCOM and Joint Task Force Guantanamo, Cuba or JTF-GTMO. The thought occurred to me-- although unlikely, that I wouldn't be surprised if the individuals detainees by the Federal Police might be turned over back into US custody-- and ending up in the custody of Joint Task Force Guantanamo.

As I digested through the information on Joint Task Force Guantanamo, I quickly found the Detainee Assessment Briefs or DABs. I previously came across the document's before in 2009 but did not think much about them. However, this time I was more curious in this search and I found them again.

The DABs were written in standard DoD memorandum format and addressed the commander US SOUTHCOM. Each memorandum gave basic and background information about a detainee held at some point by Joint Task Force Guantanamo. I have always been interested on the issue of the moral efficacy of our actions surrounding Joint Task Force Guantanamo. On the one hand, I have always understood the need to detain and interrogate individuals who might wish to harm the United States and our allies, however, I felt that what we were trying to do at Joint Task Force Guantanamo.

However, the more I became educated on the topic, it seemed that we found ourselves holding an increasing number of individuals indefinitely that we believed or knew to be innocent, low level foot soldiers that did not have useful intelligence and would be released if they were still held in theater.

I also recall that in early 2009 the, then newly elected president, Barack Obama, stated that he would close Joint Task Force Guantanamo, and that the facility compromised our standing over all, and diminished our quote 'moral authority' unquote.

After familiarizing myself with the Detainee Assessment Briefs, I agree. Reading through

the Detainee Assessment Briefs, I noticed that they were not analytical products, instead they contained summaries of tear line versions of interim intelligence reports that were old or unclassified. None of the DABs contained the names of sources or quotes from tactical interrogation reports or TIR's. Since the DABs were being sent to the US SOUTHCOM commander, I assessed that they were intended to provide very general background information on each of the detainees and not a detailed assessment.

In addition to the manner in which the DAB's were written, I recognized that they were at least several years old, and discussed detainees that were already released from Joint Task Force Guantanamo. Based on this, I determined that the DAB's were not very important from either an intelligence or a national security standpoint. On 7 March 2010, during my Jabber conversation with Nathaniel, I asked him if he thought the DAB's were of any use to anyone.

Nathaniel indicated, although he did not believe that they were of political significance, he did believe that they could be used to merge into the general historical account of what occurred at Joint Task Force Guantanamo. He also thought that the DAB's might be helpful to the legal counsel of those currently and previously held at JTF-GTMO.

After this discussion, I decided to download the data. I used an application called Wget to download the DAB's. I downloaded Wget off of the NIPRnet laptop in the T-SCIF, like other programs. I saved that onto a CD-RW, and placed the executable in my 'My Documents' directory on my user profile, on the D6-A SIPRnet workstation.

On 7 March 2010, I took the list of links for the detainee assessment briefs, and Wget downloaded them sequentially. I burned the data onto a CD-RW, and took it into my CHU, and copied them onto my personal computer. On 8 March 2010, I combined the Detainee Assessment Briefs with the United States Army Counterintelligence Center reports on the WLO, into a compressed IP file. Zip files contain multiple files which are compressed to reduce their size.

After creating the zip file, I uploaded the file onto their cloud drop box via Secure File Transfer Protocol. Once these were uploaded, I notified Nathaniel that the information was in the 'x' directory, which had been designated for my own use. Earlier that day, I downloaded the USACIC report on WLO.

As discussed about, I previously reviewed the report on numerous occasions and although I saved the document onto the work station before, I could not locate it. After I found the document again, I downloaded it to my work station, and saved it onto the same CD-RW as the Detainee Assessment Briefs described above.

Although my access included a great deal of information, I decided I had nothing else to send to WLO after sending the Detainee Assessment Briefs and the USACIC report. Up to this point I had sent them the following: the CIDNE-I and CIDNE-A SigActs tables; the Reykjavik 13 Department of State Cable; the 12 July 2007 aerial weapons team video and the 2006-2007 rules of engagement documents; the SigAct report and supporting documents concerning the 15 individuals detained by the Baghdad Federal Police; the USSOUTHCOM and Joint Task Force Guantanamo Detainee Assessment Briefs; a USACIC report on the WikiLeaks website and the WikiLeaks organization.

Over the next few weeks I did not send any additional information to the WLO. I continued to converse with Nathaniel over the Jabber client and in the WLO IRC channel. Although I stopped sending documents to WLO, no one associated with the WLO pressures me into giving more information. The decisions that I made to send documents and information to the WLO and the website were my own decisions, and I take full responsibility for my actions.

Facts regarding the unauthorized disclosure of Other Government Documents.

One 22 March 2010, I downloaded two documents. I found these documents over the course of my normal duties as an analysts. Based on my training and the guidance of my superiors, I look at as much information as possible.

Doings so provided me with the ability to make connections that others might miss. On several occasions during the month of March, I accessed information from a Government entity. I read several documents from a section within this Government entity. The content of two of these documents upset me greatly. I had difficulty believing what this section was doing.

On 22 March 2010, I downloaded the two documents that I found troubling. I compressed them into a zip file named blah.zip and burned them onto a CD-RW. I took the CD-RW to my CHU and saved the file to my personal computer.

I uploaded the information to the WLO website using the designated prompts.

Facts regarding the unauthorized storage and disclosure of the Net Centric Diplomacy Department of State Cables.

In late March of 2010, I received a warning over Jabber from Nathaniel, that the WLO website would be publishing the aerial weapons team video. He indicated that the WLO would be very busy and the frequency and intensity of our Jabber conversations decrease significantly. During this time, I had nothing but work to distract me.

I read more of the diplomatic cables published on the Department of State Net Centric Diplomacy. With my insatiable curiosity and interest in geopolitics I became fascinated with them. I read not only the cables on Iraq, but also about countries and events that I found interesting.

The more I read, the more I was fascinated with the way that we dealt with other nations and organizations. I also began to think the documented backdoor deals and seemingly criminal activity that didn't seem characteristic of the de facto leader of the free world.

Up to this point, during the deployment, I had issues I struggled with and difficulty at work. Of the documents release, the cables were the only one I was not absolutely certain couldn't harm the United States. I conducted research on the cables published on the Net Centric Diplomacy, as well as how Department of State cables worked in general.

In particular, I wanted to know how each cable was published on SIRPnet via the Net Centric Diplomacy. As part of my open source research, I found a document published by the Department of State on its official website.

The document provided guidance on caption markings for individual cables and handling instructions for their distribution. I quickly learned the caption markings clearly detailed the sensitivity of the Department of State cables. For example, NODIS or No Distribution was used for messages at the highest sensitivity and were only distributed to the authorized recipients.

The SIPDIS or SIPRnet distribution caption was applied only to recording of other information messages that were deemed appropriate for a release for a wide number of individuals. According to the Department of State guidance for a cable to have the SIPDIS [missed word] caption, it could not include other captions that were intended to limit distribution.

The SIPDIS caption was only for information that could only be shared with anyone with access to SIPRnet. I was aware that thousands of military personnel, DoD, Department of State, and other civilian agencies had easy access to the cables. The fact that the SIPDIS caption was only for wide distribution made sense to me, given that the vast majority of the Net Centric Diplomacy Cables were not classified.

The more I read the cables, the more I came to the conclusion that this was the type of information that should become public. I once read a quote on open diplomacy written after the First World War and how the world would be a better place if states would avoid making secret pacts and deals with and against each other.

I thought these cables were a prime example of a need for a more open diplomacy. Given all of the Department of State cables that I read, the fact that most of the cables were unclassified, and that all the cables have a SIPDIS caption.

I believe that the public release of these cables would not damage the United States, however, I did believe that the cables might be embarrassing, since they represented very honest opinions and statements behind the backs of other nations and organizations.

In many ways these cables are a catalogue of cliques and gossip. I believed exposing

this information might make some within the Department of State and other government entities unhappy. On 22 March 2010, I began downloading a copy of the SIPDIS cables using the program Wget, described above.

I used instances of the Wget application to download the Net Centric Diplomacy cables in the background. As I worked on my daily tasks, the Net centric Diplomacy cables were downloaded from 28 March 2010 to 9 April 2010. After downloading the cables, I saved them on to a CD-RW.

These cables went from the earliest dates in Net Centric Diplomacy to 28 February 2010. I took the CD-RW to my CHU on 10 April 2010. I sorted the cables on my personal computer, compressed them using the bzip2 compression algorithm described above, and uploaded them to the WLO via designated drop box described above.

On 3 May 2010, I used Wget to download and update of the cables for the months of March 2010 and April 2010 and saved the information onto a zip file and burned it to a CD-RW. I then took the CD-RW to my CHU and saved those to my computer. I later found that the file was corrupted during the transfer. Although I intended to re-save another copy of these cables, I was removed from the T-SCIF on 8 May 2010 after an altercation.

Facts regarding the unauthorized storage and disclosure of Garani, Farah Province Afghanistan 15-6 Investigation and Videos.

[NB Pfc. Manning plead 'not guilty' to the Specification 11, Charge II for the Garani Video as charged by the government, which alleged as November charge date. [Read more here.](#)]

In late March 2010, I discovered a US CENTCOM directly on a 2009 airstrike in Afghanistan. I was searching CENTCOM I could use as an analyst. As described above, this was something that myself and other officers did on a frequent basis. As I reviewed the incident and what happened. The airstrike occurred in the Garani village in the Farah Province, Northwestern Afghanistan. It received worldwide press coverage during the time as it was reported that up to 100 to 150 Afghan civilians-- mostly women and children-- were accidentally killed during the airstrike.

After going through the report and the [missed word] annexes, I began to review the incident as being similar to the 12 July 2007 aerial weapons team engagements in Iraq. However, this event was noticeably different in that it involved a significantly higher number of individuals, larger aircraft and much heavier munitions. Also, the conclusions of the report are more disturbing than those of the July 2007 incident.

I did not see anything in the 15-6 report or its annexes that gave away sensitive information. Rather, the investigation and its conclusions were-- what those involved should have done, and how to avoid an event like this from occurring again.

After investigating the report and its annexes, I downloaded the 15-6 investigation, PowerPoint presentations, and several other supporting documents to my D6-A workstation. I also downloaded three zip files containing the videos of the incident. I burned this information onto a CD-RW and transferred it to the personal computer in my CHU. I did later that day or the next day-- I uploaded the information to the WL website this time using a new version of the WLO website submission form.

Unlike other times using the submission form above, I did not activate the TOR anonymizer. Your Honor, this concludes my statement and facts for this providence inquiry.
